Your Responsibilities

Your core responsibility is the development, maintenance, and integration of automated test systems to ensure the quality of Threedy's core product instant3Dhub.

Due to the complexity of the instant3Dhub visualization platform architecture, we rely on automated testing. So far, we have a rudimentary testing infrastructure to cover the rich instant3Dhub feature set.

Therefore, as member of the QA team, you will develop new automated regression, performance and workload tests and create transparent automatically generated dashboards to visualize the results. You help analyzing issues and communicating them with the other development teams. As member of the QA-team you help to improve the quality of instant3Dhub by developing new processes, tools, and concepts to prevent future issues.

Your profile

You are reliable, have a high sense of responsibility and work on topics holistically. You like to work as a team and have good communication skills. You are fluent in English and like to work with international teams. You have an enthusiasm for technology and love to work with cutting-edge technologies in a highly dynamic environment.

You have good skills in programming and experience with complex software architectures. You ideally have already experience with programming languages like JavaScript/TypeScript, Node.js and Python. You have experience with cloud technologies like Docker and Kubernetes. You are experienced with test automation and continuous integration and development tools like GitLab CI.

What we offer

- **A young & dynamic team:** Threedy has a young and ambitious team where we all pull together to achieve our goals.
- **Always High-Tech:** We use state-of-the-art technologies to revolutionize the industrial use of 3D - today and in the future!
- **Opportunities for advancement:** The foundation for significant growth has already been laid. With us, everyone therefore has the chance to prove their abilities and to shape and follow their own individual career path.

- **Comprehensive activity:** Take responsibility, develop, and shape your area and thus significantly influence the overall success of our company. You can look forward to an exciting and varied time with the many different challenges.

About Threedy

Threedy develops instant3Dhub, the first visual-computing-as-a-service technology, revolutionizing the industrial use of 3D data. instant3Dhub combines state-of-the-art technologies from the areas of rendering, cloud and microservice platforms to enable seamless use of 3D visualization, mixed reality, and collaborative work in any industrial application.

instant3Dhub has been in productive use for several years with several customers, especially large German automotive manufacturers. For further development and to bring a successful product to the next level, Threedy GmbH was spun off at the end of 2020. Since then, Threedy has already been able to record a number of successes. Our team currently comprises around 15 employees.
